| No. of Teachers participated | 03   |
| No. of Students participated | 16   |
| Content                      | <ul style="list-style-type: none"><li>• The aim of field visit was to fulfill the curriculum of lab course - I of M.Sc. Zoology.</li><li>• Mr. Balram Kurrey Assistant Professor Zoology said that this educational visit helps the student to learn the procedure of silk production. He said that Sericulture is the production of raw silk by means of raising caterpillars, particularly those of the domesticated silkworm. The production of silk generally involves two processes: care of the silkworm from the egg stage through completion of the cocoon.</li><li>• This field visit motivates the students to applying sericulture for livelihood and for further research purpose.</li></ul> |
